PLASTIC MOULDING

THERMOPLASTICS AND THERMOSETTINGS MOULDING

▲ THERMOPLASTICS AND THERMOSETTINGS MOULDING

SINCE 1977

- Thermoplastics and thermosettings moulding
- Automatic and manual overmouldings
- Wiring overmoulding and assembling
- Moulds production
- Painting
- Serigraphy
- Automations for overmouldingsed

✓ Since 1977, Matic 2 works in thermoplastics and thermosets, specialised in the moulding of technical parts

*Matic 2 is a dynamic, flexible and reliable company, strongly oriented to customer needs
Matic 2 is able to develop tailored made projects and to find solutions to any kind of injection moulded product, giving full support to its customers*

Among Matic 2's strengths, the capability of planning and constructing serial moulds and prototypes stands out

✓ Our plant is 2000 m² large and stands on a total area of 4000 m².
Matic 2 works 3 shifts per day

MULTI STEP PROCESSING
Moulding, overmoulding, assembly and supply of complete sets

▲ LOGISTIC SERVICE

Our logistic dept. manages complex customer requirements, as:

- Automatic receiving and transmission data system through DESADV-EDI procedures.
- Management of customers schedules, with weekly executive order and medium term forecasts.
- Daily deliveries.
- We offer cost free transport to costumer's plants

MOULDS AND TOOLS

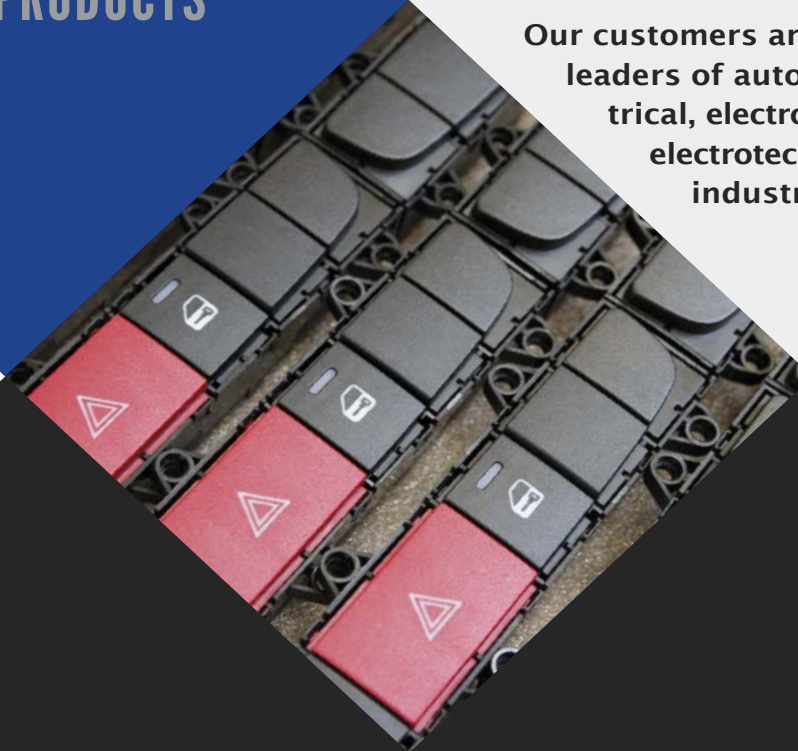

We are specialised in moulding and over-moulding, including metal inserts and pins. Matic 2 gives great importance to the quality of its products, of the technical parts, but also taking care of their aesthetics.

We cooperate with our clients throughout the whole engineering process *starting from product idea to prototype*, from preliminary studies to the mould.

Our technical department takes care of the planning and the realisation of new moulds and auxiliary equipments, to fully automate production processes.

Our customers are international leaders of automotive, electrical, electronic and electrotechnical industries

✓ OUR PRODUCTS

QUALITY ASSURANCE ISO 9001:2008

Matic 2 quality assurance system is ISO 9001:2015 certified.

Our quality control software links and works with production planning software and supplies real time information about the running productions.

The activity of quality control is carried out through a mobile control stations which ensures the presence of quality checks in production departments

Our high level quality standard allows us to hold on to and to increase the share market through our national and international main customers.
